#### THE GAME

It has been six years since you took on the alien five single handed, obliterated their extended lines, turning their motherships into expanding clouds of vapour, grabbing those pieces of extra hardware for your trusty old ship. Those were the days. You retired to the planet Sloar inhabited by small furry animals. You wanted to spend your last years playing sports, consulting and mounding exotic adventures surrounded by cute creatures. But you became restless, your soul yearning for the thrill of the fight, to battle against incredible odds. Well here's your chance to do just that. Once again the Inter Galactic Federation needs your help.

The enemy have captured Tamin, the second most strategically important planet this side of the Solar System. But you must fly your Gloried class death fighter over the planet destroying as many enemy ships as possible. If you destroy an entire formation then you can collect extra equipment for your ship.

#### CONTROL

To control your ship use a joystick on Port 2.
